

Ben Creevey
Corporate Telecommunications Manager
Thiess

Biography

Joining Thiess in 1999 into the Data Telecommunications division within Thiess' Information Systems arm, Ben is responsible for the planning, design and delivery of the corporate WAN and Telecommunications systems.

He leads a dynamic team of individuals who drive a complex, converged voice, video and data IP network using a variety of delivery mediums including; MPLS, Ethernet, Frame Relay and wireless technologies.

Mobility solutions are also delivered using 2G and 3G networks along with ADSL and a growing fleet of mobile satellite trailers for regional projects and quick project start-ups.

Ben is an active member of AIM and AIPM and represents Thiess in many industry associations such as ATUG, AusCERT & SAGE.

He holds relevant certifications in Project Management and Data Comms along with specialist communications systems equipment including microwaves, wireless systems and satellite communications.

Ben has completed a Grad. Cert. in Business Management and is currently completing further studies towards an MBA. He is also a current board director with ATUG.
