ATUG crossXconnect

“KELVIN GROVE URBAN VILLAGE - A BROADBAND VILLAGE ON OUR DOORSTEP”

Received Special Mention for the ATUG National Awards for the effective Use of Broadband

This month QLD ATUG crossXconnect, to be held on Wednesday 18 April will feature Penny Somerville, Principal Project Officer, Portfolio Development Group, Department of Housing, and Tim Malone, Practice Director of Gibson Quai-AAS (who are acting as ICT Project Coordinator for the Department of Housing and Queensland University of Technology.)

The presentation will outline the case study the Department of Housing submitted for the ATUG National Awards for the Effective Use of Broadband.

Broadband is currently very topical with competing proposals from Telstra, G9, Federal Government and Opposition. There are also small development projects actually delivering Fibre to the Home broadband. Kelvin Grove Urban Village, a joint development by the Department of Housing and Queensland University of Technology, has overcome last mile reliance upon major carriers by facilitating community ownership of FTTH infrastructure.

This presentation will give an introduction to the Kelvin Grove Urban Village, examine the aims and objectives of the ICT Strategy for the Village and review progress including pit-falls of technical and service management approaches adopted.
